The 602 crate engine for the Super Stock division is a option, not a mandatory rule addition for the 2012 season. There may have been some confusion regarding the new rule so we wanted to take this moment to make sure all the Super Stock competitors were aware that the 602 crate engine is an optional engine package and not a mandatory engine package. We hope this has helped clear up any miscommunication.

Going forward, we have **no** plans to make this engine the sole, mandatory option.
